Student Details

Name: **SIDDIKI HASAN AL BANNA (1732003)**	Section: 03	Date: 10/06/2021
Topic: TRAVEL VOYAGE IN MALAYSIA	Group Name: GROUP 1	

Implementation Details

What do I know about the project? *(Project information and its functionalities)*	*Which part of the project I need to develop?* *(Elaborate all the specific tasks assigned by your group leader)*	*How do I develop it?* *(Specific component, API, function, etc., which needed to develop your part)*
Travel Voyage in Malaysia is a website with a wide range of tourist spots collection where the user can get all the information. We have used HTML, CSS, JavaScript to develop this. We are expecting that tourists will visit our website when they want to travel around Malaysia as we highlight the essential things on the website such as the history of the tourist places and where they are located, some easy ways to find and book a guide by just finding the location to be visited on the Google Map. On our main homepage, we give some previews on some hot promotions to attract the tourists to grab the deals. Lastly, we put the newsletter subscription box for them to drop their email address if they are interested in getting the latest updates about the travelling news or promotions. General information of the company such as our official email address, contact numbers, is listed on the website if there is any enquiry or feedback from the customers.	1. I developed Find a Guide page (HTML, CSS, JavaScript, API), and Booking page (HTML, CSS, JavaScript). 2. Navigation bar for every page and added it. 3. Connect and linking all the pages. 4. Edit and solve the errors in other pages upon linking the navigation bar.	1. To develop my pages I used HTML, CSS and JavaScript in every page. 2. To provide location and details information I used API 6 times. 3. Provide third party website links. 4. Correctly documented the files. 5. Used JavaScript and Popup box on the booking page to show customers their reservation has successful. 6. Used JavaScript Subscribe button and popup on my page to provide customers latest news.
